

Assignment #2 - Placing Images

Authoring Interactive Media

Sal J. Barry, Instructor

In this assignment, you will make a new page called a2.html and place text and images on that page.

1. Create a new HTML page named a2.html - be sure to include `<DOCTYPE!>`, `<head>`, `<body>` and all that other good stuff.
2. Copy and paste some text from Wikipedia
 - At least 5 paragraphs
 - Can be about any topic you like
3. Format the text using `<p>` and `</p>`
4. Also use at least one heading `<h1>`
 - You can use subheadings `<h2>` if you wish
 - Use ``, `` or `<blockquote>` tags if appropriate
5. Find 5 images and place them on your page using the `` tag
 - The images should be about your topic and go with the text
 - Align the images so that they are next to the text - use the align attribute

```

```
6. Upload a2.html and your 5 images to your server space
7. Go back to index.html and make the words "Assignment 2" link to a2.html
8. Upload index.html to your server space so that the "live" version has your link to Assignment 2

Assignments

1. Text Formatting
2. Placing Images
3. CSS Text Formatting
